AUTUMN BRINGS GREAT CHANGES FOR FIMVO

[The supplier of the verification system will change in November.](#) System changes are always a major project, and this time is no exception. Our team has worked tirelessly throughout the year to ensure that the transition is smooth and as invisible as possible. A big thank you to all the IT suppliers of pharmacies, dispensaries, hospital pharmacies, and wholesalers who have collaborated with us to guarantee the success of the project.

We have successfully completed the first phase, transitioning the test environment. Now, we are gearing up for the changes in the production environment, scheduled for November overnight, to minimise disruptions.

Read more about our project from the link above. You are also welcome to our information sessions, which we will organise three times during the autumn. In these sessions, we will discuss the project's impact and the responsibilities of system users. More information below!
